

Voyager Star

Prestanda, flexibilitet och intelligens.

- Tack vare den speciella optiken riktar Voyager Star belysningen precis där den behövs i nödsituationer. De breda mellanrummen innebär att det (i motsats till andra lösningar) går att spara på antalet armaturer och således sänka projektets totalkostnader.
- Voyager Star kan användas för ett antal olika monteringar. Armaturen är tillgänglig i den infällda versionen som integreras diskret i taket och i en ytmonterad version som kan integreras i Thorns PRIMATA-system.
- Armaturen kan konfigureras och adresseras på ett enkelt sätt med PROset Tools, och även anslutas till styrdon LITECOM eller SB128 (version E1D/E3D). Versioner med centralt batteri (version ECC/ECS) är dessutom tillgängliga.

Fotografier, ritningar och fotometriska data är endast exempel. Välj en produkt för att visa specifik produktinformation.
